

KINDER
REPUBLIK

EUROPEAN DISTRIBUTORS

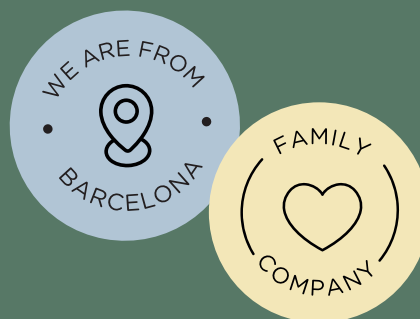

Practical, functional and design.

We are **Kinder Republik**, a family business located in Barcelona. Our passion for the children's sector is what drives us to search for and discover products designed to make life easier for babies and their parents.

Since 2015 we have been working to introduce products from American brands, pioneers in design and functionality, into Europe.

Do you want to join us?

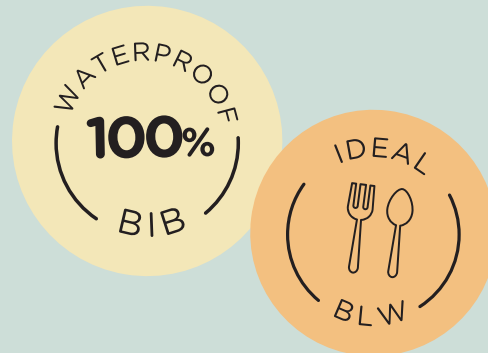

Highly stain resistant

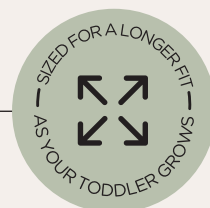

A “Bapron” is our unique bib-apron hybrid, designed specifically for children who dislike traditional bibs that tie around the neck, and who are self-feeding at an early age (baby led weaning).

Our Baprons are 100% waterproof and highly stain resistant! They’re majorly durable, and rinse clean in the sink too, so you can go days upon days without ever having to wash them in the laundry (although you totally can... they’re machine washable/dryable).

First step to self-feeding

The NumNum prespoon is the revolutionary new first step to self-feeding. Its innovative flat design makes it easier to use than a spoon because there is no scooping, no balancing and no wrong way to hold it!

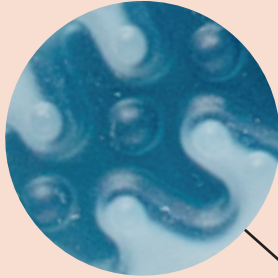

The stage one has textures that grab just enough food to give a taste of self-feeding independence. Those textures also feel great on sore gums! For kids who have mastered the food-to-mouth motion, the stage two is perfect for thicker blends and pre-loading with solids.

Before long, your little learner will begin making a scooping motion, an indication he or she is ready to graduate to the spoon.

Stage 1

Use the stage 1 pre-spoon with raised textures as a mealtime teether so your child gets used to holding a utensil.

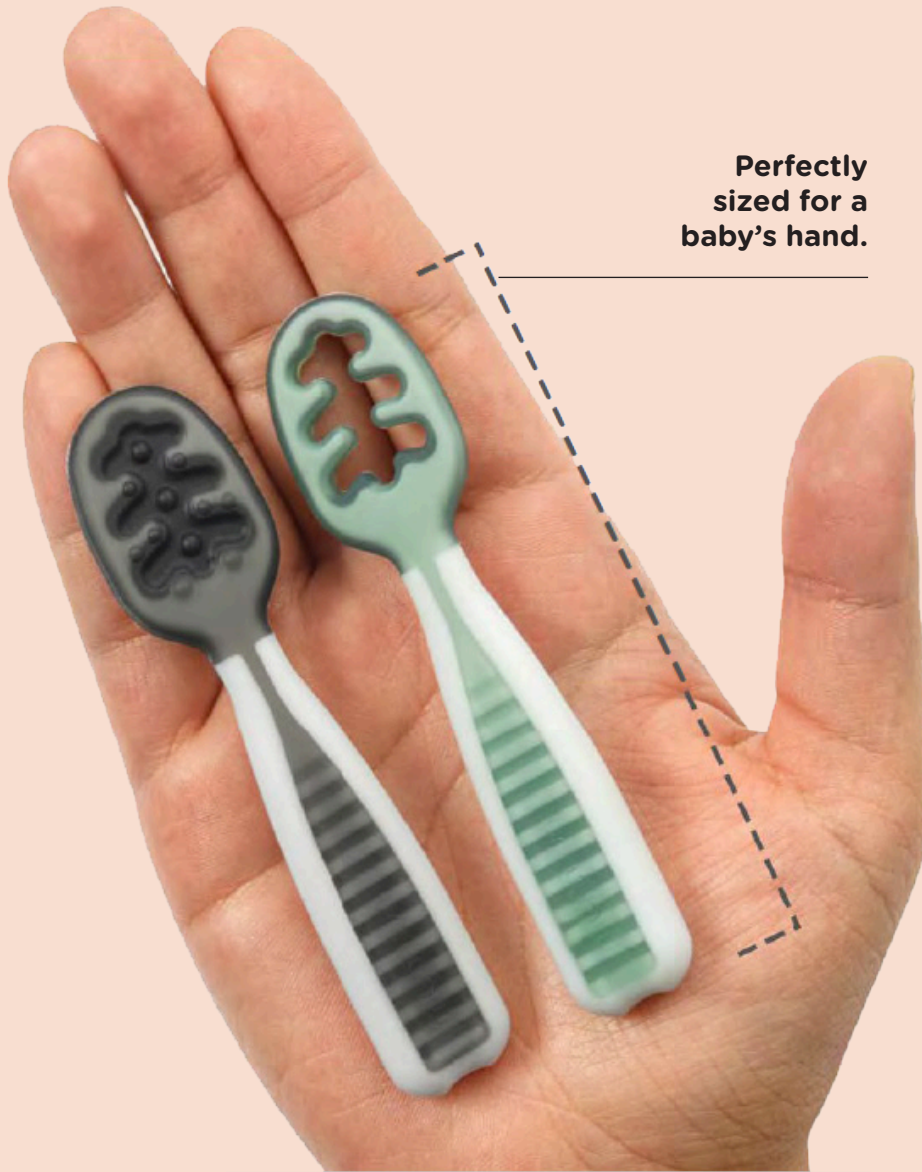

Raised ridge design with soft silicone is perfectly sized for a baby's hand.

Stage 2

Raised ridge design with soft silicone is perfectly sized for a baby's hand.

**Perfectly
sized for a
baby's hand.**
